MONTHLY CROP REPORT. FRANKFORF, KT , Oct. 10, 1889.

CORN.

Taking the Assessora' returns as a basis, the total acresage of the crop, for 1888, was 2 292 819; and the total yield was 51,505,546 bushels. In 1889, according to our regular correspondents, the acreage has increased 11 per cent, over 1888, and the increase in condition, as expressed in bushels, is 31; per cent. These data would make the total acreage in 1889, 2,545,-109—an increase of 252,290 acres over 1888—and the total yield in bushels would be 59,267,362, or a total increase in the State, over '88, of 7,761,-716 bushels.

The table, for the two years, would stand as follows:

1889.

1889.
Acres, 2,292.819 ... Acres, 2,545,169
Bushels, 51,505,546 Bushels, 59,207,362
The ear is well filled out and perfectly matured; and the seap well out of danger from frost. The blade lalarge and the yield of fodder will be good.

Wheat was a fine crop, but much injured by the rains and continued wet weather that ensued immediately after harvest, which have brought its averages down to about 87 and 84. Other small grain, capecially oats, seem to have shared the same fate. The same may be said of the fruit crop; and the complaint of rotting and failing off is general, over almost the entire State.

TOBACCO.

most the entire State.

TOBACCO.

In our report of September 4th, we gave replies from 1,514 farmers, who planted 20,424 acres in tobacco, it isses; the same tarmers have 12,597 acres of that crop; in 1889. We now submit reports from 1,662 farmers, who planted 22,596 acres, in 1888; the same farmers in 1889 planted 14.106 acres.

It will be seen from these reports, that the acresgeof '89 is 62 54 per cent. of that of '88. Our report of July Ist, gave it as 62% per cent. of the acreage of '88; and our report of Septith, placed it at 61% per cent. The present being 62 51, it is conclusive, that these three reports, being so nearly the same, can not be far out of the way, unless our correspondents have all systematically errod—which is simply incredible.

We gave condition Sept. 4th at 70% compared with '88. At that time about 20 per cent. In the hill. Since then, the weather has been all that could be desired for its maturing, housing, and curing. The condition as applied to pounds, has been increased from 70% to 80. If, for example, A planted 100 acres in '88, and raised 1,000 pounds to the acre, he would have a yield of 100,000 pounds. If in '89 he planted 62% acres, and raises 1,000 pounds. But, suppose the condition—as applied to pounds—should be 20 per cent. less than last year—how would the table stand after taking the 20 per cent. less than last year—how would the table stand after taking the 20 per cent. ess than last year—how would the table stand after taking the 20 per cent. off of the 62% acres of Afa crop of '89.

Here are the figures:

1888 1889

Thus A would have produced just 50 per cent. in pounds in '89 of what

Thus A would have produced just 50 per cant. in pounds in '89 of what he had raised in '89. These are precisely the facts as shown by our correspondents throughout the tobacco growing counties, and we make the deductions merely to simplify their presentation. Some few sections or neighborhoods have as much acreage as last year; some 75; some 50 per cent; and some less. The crop is not so heavy as it was last year, and this is the reason why we allude to the condition as applying to pounds and not to quality. The crop will be generally bright and very useful for manufacturing purposes, except manufacturing purposes, except where it was cut too green and froze in the barn or frosted. It has fair to good body, with small fibre, but is

good body, with small fibre, but is rather narrow in leaf.

The crop is reported by nearly all correspondents to be badly worm eaten. The frost scare in September caused a good deal to be cut green. The "killing frosts" on the night of the 7th and 8th of October found the large bulk of the crop safely housed. In order to ascertain the damage by this frost, we telegraphed over the State and submit replies:

Bowling Green—Remnant outstanding killed—perhaps 5 per cent. Georgetown—No tobacco out here. About 15 per cent. damaged by freezing in barns.

Such was the verdict of the mighty throng of visitors to our Cloak department on Opening Day.

ALL UNITED

In praise of the grand collection of elegant garments, enormous assortment & perfect run of sizes.

ALL AGREED That we showed the greatest values and named the lowest prices

ever known to the trade. THEIR APPRECIATION

Was shown in the tremendous business done in this department. We sold more Cloaks in one day than our competitors carry in

We buy direct from manufacturers, saving the Jobbers' profit, and selling for cash, we have no bad debts to make good customers pay for.

Miss Eunice Wood's school, of this has erected a grain elevator of 49,000 bushels capacity.

Georgetown—The Georgetown months school.

Water Co. will erect an electric-light Mr. W. A. Reed left this evening

atock will be \$100,000. Machines will be made at Cincinnati, O.

Horrodsburg—The Harrodsburg
Electric-light & Powder Co., previously reported, has received contract to light the city.

Henderson—Emil Schlamp is erecting a box factory.

Louisville—Suzer & Vogt will move their machine shop to another location.

Louisville,—The National Sanitary Frank Lesis's Popular Monthly for

The "killing frosts" on the night of the 7th and Stho of October found the harge bulk of the crop safely housed. In order to ascertain the damage by this frost, we telegraphed over the State and aubmit replies:

Bowling Green—Remnant outstanding filled—perhaps 5 per cond. Georgetown—No tobaceo out here, About 15 per cent. damaged by frees.

Maywille—Careful inquiry reveals no damage by frost.

Lexington—Damage by frost will not exceed 5 per cent.

Horse Cave—Best information putstance and solve the filled—perhaps for condition.

Mayfield—Damage about 10 per cent.

Mayfield—Damage about 10 per cent.

FOTATOES.—

Both sweet and Irish, are a fine crop in all sections of the State—the average being over 100 both as to across and condition.

Makes a botter showing than usual some of the counties reporting both acreage and condition largely over 100, and pastures were hardly over 100, and pastures when have been organized with Adam Baum as president.

Newport—Harry Wadsworth has accured a site for his watch-case factory, lately reported as to be erected. B

Newport—Robert A. Davis and M. B. Kendrick will publish a newspaper.

In the early part of the season this crop promised very poorly, but the season being well adapted to its growth, we are glad to report a good crop with a fine lint. Farmers profiting by past experience are generally stacking.

The full effects of the first frost and freeze can not yet be fully determined, but is very considerable—as affecting late crops. Wheat seeding began about Sept. 20th, and has been progressing without interruption. Want of moisture will rotard asceding in some sections.

Yery respectfully,

Chas. Y. Wilson.

Commissioner of Agriculture.

Subscribe for the Kentuckian and get the news, \$2 a year.

Newport—Robert A. Davis and M. B. Kendrick will publish a newspaper.

Owensboro—The Dean Field Coal Mining Co., reported last week as to organize a term of put in a wire rope hamilage plant at coal mine, is opening a new mine. Will want all necessary machinery for operating on a large scale.

Paris—The Paris Water Co. will probably not build its water works, istoly mentioned, before the spring of 1891.

Princeton—S. S. Brown, reported last week as to organize a \$300,000 stock company in Pittsburgh, Pa, to purchase iron mines and build an iron farance, states that "nothing definite as to the furnace can be said until the iron deposits of the section have been carefully examined as to extent and quality, but such a further and quality. But such a further and quality. Want for the name of the process of the section have been carefully examined as to extent and quality, but such a further and quality. Want for the name of the process of the section have been carefully examined as to extent and quality, but such a further of the process of the section have been carefully examined as to extent and quality, but such a further of the process of the section have been carefully examined as to extent and quality.
